PROFESSIONAL SUMMARY

Full-Stack Developer (MERN/Next.js) with hands-on experience building production-grade apps for education, e-commerce, and AI-based platforms. Proficient in developing responsive UIs, integrating third-party APIs, implementing secure auth, and building real-time dashboards. Passionate about creating meaningful digital experiences with scalable architectures and seamless UI/UX flows.

EDUCATION

O.P. Jindal University
Bachelor of Technology in
Computer Science and Engineering
Cumulative GPA: 7.40/10.0

Raigarh, Chhattisgarh
Expected April, 2026

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind, TypeScript, Bootstrap
- **Backend:** Node.js, Express.js, REST API, JWT
- **Database:** MongoDB, Mongoose, SQL
- **Tools:** Git, GitHub, Postman, VS Code, Figma, GSAP, Framer motion
- **AI Tools:** Gemini API, Replicate API, Langchain

WORK EXPERIENCE

Full Stack Development Intern | Proxenix

June 2025 – August 2025

- Developed production-level full-stack applications, including Edureka (a Coursera-style LMS) and FeedbackPro (an AI-powered feedback platform), using Next.js, MongoDB, Express.js, and Node.js.
- Integrated real-time features, GSAP animations, role-based authentication, and Gemini API-based sentiment analysis into client-platforms.
- Collaborated remotely with the team on scalable, responsive solutions aligned with modern web design principles.

Full Stack Development Intern | Cognifyz Technologies

June 2025 – July 2025

- Built and deployed advanced full-stack applications such as DreamFrame AI (an AI image generator), TaskFlow Pro, and Blog Platform using the MERN stack and external APIs like Replicate and Google Books.
- Focused on backend integration, database design, JWT authentication, and dynamic UI/UX workflows.
- Demonstrated initiative and precision in delivering real-world software features under tight deadlines.

PROJECTS

Eduverse – Coursera-Style Online Learning Platform

July 2025

- Built a full-stack LMS using Next.js, Express.js, MongoDB, and JWT auth with dynamic course creation, enrollment tracking, and admin dashboards. Designed scalable APIs and optimized real-time updates.
- [GitHub](#) | [Live](#)

FeedbackPro – AI Sentiment Feedback Collection Platform

June 2025

- Developed a real-time feedback system with Next.js, Express, MongoDB, and GSAP. Integrated Gemini API for sentiment analysis and built a live dashboard with Socket.io and QR-based form sharing.
- [GitHub](#) | [Live](#)

Epeolodies – Full-Stack E-Commerce Website

May 2025

- Built a modern e-commerce site using HTML, CSS, React, Node.js, Express, and MongoDB with secure auth, cart, admin dashboard, and Stripe-like payment integration. Improved performance and reduced bugs by 30%.
